

Website

PROFILE

Master's student in Software, Web & Cloud Technologies and a Full-Stack Developer with hands-on experience designing, building, and maintaining scalable web applications and product-oriented systems. Strong background in modern JavaScript/TypeScript development using React and Node.js, with experience working across the full development lifecycle from planning features and designing system architecture to implementation, testing, and continuous improvement.

Comfortable developing user-focused interfaces, building RESTful backend services, and working with relational databases such as MySQL. Experienced in writing clean, maintainable code, collaborating in agile teams, and contributing to code reviews, bug fixing, and iterative product development. I also have a strong interest in UI/UX design, focusing on creating intuitive and efficient user experiences.

Motivated, proactive, and adaptable, with a strong willingness to learn and take ownership in a collaborative team environment. Particularly interested in contributing to product-driven platforms where usability, reliability, and continuous improvement are key.

EDUCATION

M.Sc. in Software, Web & Cloud, Computing Sciences and Electrical Engineering,

Tampere University, Finland | 2025 – Present

- Focus on software engineering fundamentals, cloud-native systems, DevOps practices, and distributed systems.
- Coursework involving Linux-based environments, containerized applications, backend development, and system-level problem solving
- Hands-on academic projects and teamwork through university labs and group assignments

Minor: Generative Artificial Intelligence - Present

- Core topics include AI fundamentals, deep learning, LLM fine-tuning, MLOps concepts, and responsible AI principles.

B.Sc. (Hons) Information Technology – Specialization in Software Engineering, (SLIIT), Sri-Lanka | 2020 – 2023 – GPA (3.5 / 4)

- Strong foundation in programming, database systems (SQL/MySQL), web development, and software engineering principles
- Experience developing real-world applications with focus on usability, performance, and maintainability

WORK EXPERIENCE

Software Engineer

ZILLIONe | Enterprise Technology Solutions

[October 2023 – August 2025]

Leading enterprise tech provider in ERP, CRM, cloud, and cybersecurity across APAC, (Sri-Lanka)

- **Awarded Best Presales** (POS) for technical contribution and customer impact.
- **Designed and developed user-facing web applications for ERP and POS systems** using React and modern JavaScript/TypeScript frameworks
- **Built and maintained frontend architecture, integrating with backend services via REST APIs**
- **Implemented features supporting real-world workflows such as** transaction processing, inventory management, and financial operations
- **Collaborated on** system integrations with banking services, **ensuring secure and reliable data flow**
- **Participated in** UAT sessions with clients (e.g., SLIC, Dialog), **validating functionality and improving usability based on feedback**
- **Contributed to improving** UI/UX, **focusing on responsive and intuitive interfaces.**

Software Engineer

Coduza | IT and Software Engineering Solutions

[April 2024 – October 2024]

Delivers custom CRM, web, and mobile applications for global clients, (Sri-Lanka)

- Developed and maintained backend-supported web and CRM features using Node.js, implementing business logic and REST API integrations.
- Developed and maintained **backend-driven full-stack features** for CRM systems using **Node.js, Express, and RESTful APIs**
- Implemented business logic and designed **clean, modular, and maintainable components**
- Worked with **MySQL and SQL-based databases**, handling data modeling, queries, and optimizing data flow
- Improved application performance and system reliability through **code optimization and refactoring**
- Collaborated in an **Agile team**, contributing to requirement discussions, feature planning, and iterative development
- Participated in **code reviews, testing, and bug fixing**, ensuring high-quality and stable releases

Intern Software Engineer

Xinotech Software Solutions Pvt. Ltd.

[April 2022 - March 2023]

Specialize in IoT, automation, and blockchain software development, (Sri-Lanka)

- Contributed to an **IoT-based system**, working on backend services, system design, and device integration
- Assisted in building features that handle **real-time data and external device communication**
- Gained hands-on experience in **end-to-end system development** and real-world engineering challenges

PUBLICATIONS

- "Real-Time alert system for road safety to prevent Animal-Vehicle Conflicts in Sri-Lanka" (2024) - [\[Link\]](#)
- "IoT-Enhanced Smart Surveillance System for Wildlife Collision Prevention on Sri Lankan Roads" (2023)- [\[Link\]](#)
- "Problems Faced by the Agricultural Sector and Solutions for the Impending Food Crisis in Sri Lanka"-(2022) – [\[Link\]](#)

CERTIFICATIONS

- Google IT Automation with Python Professional Certificate
- Master of Microsoft certified Azure (AZ-900, AZ-104, AZ-500, MS-900, MS-102) (curr. following)
- Docker & Certified Kubernetes Administrator (CKA)
- HarvardX's CS50's Introduction to Artificial Intelligence with Python

LANGUAGES

- English - Full Professional Proficiency
- Finnish - Beginner (A2.1 completed, ongoing studies)

PROJECTS

Secure AI Programming Assistant for Vulnerability Detection (01/2026 – 03/2026)

- Designed and developed a secure full-stack application enabling developers to upload code and receive vulnerability analysis and secure coding recommendations
- Integrated static analysis tools with backend services to detect security issues
- Implemented a retrieval-based knowledge system to provide contextual explanations and guidance
- Built secure authentication with protected routes and role-based access
- Implemented a DevSecOps pipeline to automate security checks, testing, and code quality validation during development and deployment
- Integrated CI/CD workflows to ensure consistent builds, automated testing, and reliable deployment processes. **[React | NodeJs | JWT | Semgrep | Bandit | REST APIs | MySQL | Docker | CI/CD | DevSecOps | Figma]**

EduChat / EduLens – Client-Based Software Engineering Project

Client: Tampere University (TAU)

(12/2025 – Ongoing)

- Extended a production-grade AI-assisted learning platform integrated with the university LMS via LTI.
- Developed AI-supported chat, configurable AI-assessed exercises, and teacher analytics dashboards (EduLens).
- Ensured GDPR-compliant, on-premises AI deployment using RAG-based LLM integration. **[Angular | Python (Django) | PostgreSQL | LTI | RAG | Docker | REST APIs | GitLab | CI/CD]**

Custom ERP (POS-Centric) System

(3/2024 – 8/2025)

- Contributed to a POS-centric ERP system supporting sales, inventory, payments, and reporting.
- Developed and integrated **RESTful backend services using Node.js and Fastify** within a **microservice-based architecture**.
- Utilized **Redis** for caching and in-memory data handling to improve performance and system responsiveness.
- Worked closely with backend teams to integrate REST APIs and ensure reliable data flow across components. **[React | TS | Redux | NodeJS | Fastify | MongoDB | Redis]**

One hub- Finley's System Project

(01/2024 -02/2025)

- System architecture designed and implemented an enterprise-grade integration solution connecting multiple banks with Sage 300 ERP.
- Focused on API-based communication, data synchronization, and system interoperability. **[NodeJS | JavaScript/TypeScript | React | MySQL | REST APIs | Figma]**

Final Year Research

(11/2022 - 10/2023)

- Developed a real-time **Web** and a **Mobile Application** with an IOT device for "Real-Time alert system for road safety to prevent Animal-Vehicle Conflicts in Sri-Lanka". **[MERN Stack | React Native | Azure | Docker | Kubernetes | IoT | Arduino IDE]**
- **Nominated for NBQSA and World Summit Awards (WSA)** for innovation and real-world impact.

SKILLS

- **Programming languages:** JavaScript (ES6+), TypeScript, Python
- **Frontend Development:** React.js, Next.js, Vue.js, Redux, HTML, CSS / SCSS
- **Backend & APIs:** Node.js, Express.js, C#/.Net, REST APIs
- **Databases** – SQL, PostgreSQL, MongoDB, Redis, Firebase
- **Cloud & DevOps** – Azure, AWS, Docker, GitHub Actions, CI/CD, GitHub / GitLab
- **Mobile Development** – React Native, Flutter
- **Machine Learning & AI** – Neural Networks (ANN, CNN, RNN)- learning, TensorFlow, PyTorch, Pandas, Jupyter Notebook
- **Systems & Linux:** Linux fundamentals, command-line usage
- **Other Areas:** Agile/ Scrum, SDLC, Jira, Figma, Google Analytics
